

Toon Airplane Pack v2

Thank you for buying our pack. The following PDF contains everything you need to know about this Unity Asset pack.

Hello Unity Developer!

Thank you for buying our art pack.

This is a major update from our previous Toon Airplane Pack v1. We have added a great amount of assets to help developers prototype and create a huge variety of games. Use this pack anyway you like. Please do not resell or distribute our work, and keep supporting our development!

Kind Regards,
Cat on the Roof

The Airplanes

Apart from the 5 classic airplanes that we included in v.1, now we've added 5 new military liveries to our airplane collection. This is just an example of the variations you can create. Use the provided PSD files to customize your airplane liveries anyway you like.

The Airship

As a bonus, we thought about adding an airship to our collection. Just like the airplanes, the airship has movable ailerons, elevators and engines.
